RENEWONLINE

## So, Who is Renewonline?

In the fast-paced digital era, where convenience and efficiency are paramount, one company stands out for its groundbreaking approach to vehicle license renewals. At the heart of this innovative journey is our CEO, a visionary with a rich background in public service. With 21 years of dedicated service, he brought to our company a wealth of experience in licensing that has been nothing short of transformative.

Starting 2016, we embarked on a mission to simplify what had always been a cumbersome process: renewing vehicle licenses. Our solution? A pioneering online platform focused exclusively on license renewals. This was a game-changer. By concentrating solely on renewals, we were able to offer something unique and highly efficient.

Our platform, Renewonline, was the first of its kind to introduce the concept of electronically renewing vehicle license discs both for private individuals and in retail spaces. This innovation not only set us apart but also laid the groundwork for other companies to follow, expanding the availability of such services to the public.

The success of Renewonline has been phenomenal. Initially serving the provinces of Gauteng, Limpopo, and KwaZulu-Natal, we have now expanded our operations to process renewals nationally. Our reach doesn't stop there. We've partnered with various retail outlets, including giants like Spar, Pick n Pay, PostNet, 3@1 Printing stores, and Postlink, making our services accessible to an even broader audience. This strategic move has been especially beneficial for those in rural areas, eliminating the need for longdistance travel to renew vehicle licenses.

Our presence in retail stores is more than a business expansion; it's a testament to our commitment to making life easier for everyone. We understand the challenges and inconveniences that come with traditional renewal processes, and we've dedicated ourselves to providing a seamless and efficient solution. Our goal is to ensure that no matter where you are, renewing your vehicle license is as easy as a trip to your local store.

The journey of Renewonline is a story of innovation, commitment, and accessibility. We are proud to be pioneers in this field, leading the way for a future where vehicle license renewals are hassle-free. Our CEO's visionary leadership, rooted in his extensive public service background, has been instrumental in guiding our company's direction. Together, we are not just simplifying a process; we are enhancing lives, one renewal at a time.

As we continue to grow and expand our services, our dedication to convenience, efficiency, and customer satisfaction remains unwavering. Renewonline is more than just a platform; it's a movement towards a more accessible and user-friendly future. Join us as we drive forward, making vehicle license renewals easier for everyone, everywhere.

# How it Works

## The Process

The process for renewing a client's vehicle license through a retail outlet is as follows:

1

### PHASE 1

**Client Request Submission and Information Capture:** The renewal process commences when the client submits their request to renew their vehicle license at your store. The cashier, as the point of contact, assumes the responsibility of meticulously capturing all pertinent details from the client's identification document and the expired license disc. These details are accurately entered into the Renewonline system. The system then performs a calculation to determine the requisite renewal fee and assesses whether the payment should be made. In the event that the client opts to proceed with the renewal and successfully completes the payment, the cashier acknowledges and confirms the transaction within the system.

2

### PHASE 2

**Renewal Processing by Renewonline:** Subsequently, the Renewonline system comes into play. Once the client's payment is verified, the system electronically receives the vital information needed to process the vehicle license renewal. Following the acquisition of the necessary documentation, the system undertakes the task of updating and recording this information within our internal database. Concurrently, the documentation is scheduled for dispatch to your store.

3

### PHASE 3

**Document Delivery and Client Collection:** The final phase involves the delivery of the renewed documents to your retail outlet. The objective here is to arrange for the client's return to your store for the collection of their renewed license. This step ensures that the client receives their updated license renewal and facilitates a seamless and efficient service experience within your establishment.

4

### PHASE 4

**Collection:** Upon delivery of the documentation to your store, the client is notified thereof by the courier service. You may locate and provide the client with his/her documentation after checking out the transaction on the Renewonline Database.

## What Do You Need to Assist Your Customer?

- 

**Vehicle Information:** Ask the client for the vehicle's expired licence disk. You will capture the vehicle information need therefrom.
- 

**Personal Identification:** Request the identification of the owner of the vehicle, such as a driver's license or ID card, to verify the client's identity and capture the info on our database.
- 

**Client Payment:** Your client will need to provide you with the payment after all the information is captured and the system quotes the amount due.
